Abhishek Chauhan

Full Stack Web Developer · Laravel, React, FastAPI, AI-assisted tools

Web developer and designer from Meerut (B.Tech in Computer Science, IIMT University, 2025). I design and build websites, web apps and AI tools, and look after them once they are live. Client work so far: marketing sites and online stores on WordPress and React for agencies, startups and coaches; Laravel platforms with logins, roles, dashboards and admin panels; and AI assistants that answer from documents with citations or turn consultations into notes. On the IT web team at Subharti University I look after the university's websites and the central systems behind them, which serve its affiliated colleges, and I built the AI tools its hospital and legal office use every day. Before that, at Global Matrix Solution, I built Laravel and MySQL platforms end to end: CRM, CMS and LMS products, REST APIs, GitLab CI/CD and cPanel deployments. Day to day I work in React, Next.js, Node.js, Laravel, PHP, WordPress and MySQL.

WORK EXPERIENCE

Subharti University — Junior PHP Developer

Jul 2026 – Present

Meerut, UP · IT Department · Web Development

- Manage and maintain the university's ERP system used across the university and its 100+ affiliated colleges.
- Ship updates, bug fixes and new features on live college websites and the central ERP platform.
- Build new college websites with PHP on the backend and Vue.js or Angular on the frontend.
- Own deployment and hosting of every website and ERP update through cPanel, rolling out with minimal downtime.
- Coordinate with individual college departments to gather requirements and plan releases.
- Keep uptime, performance and security in check across the live college websites and the ERP.
- Built OPD Scan QC, OPD Scribe, ILMS and the SVSU Knowledge Assistant for the hospital, legal office and administration.
